

Proteotype	$\alpha$ 1-Antitrypsin (A1AT) Level (mg/dL)*	Result or Reflex
MM	$\geq 100$	Result
MM	$< 100$	Reflex to isoelectric focusing (IEF)
MS	$\geq 70$	Result
MS	$< 70$	Reflex to IEF
MZ	$\geq 70$	Result
MZ	$< 70$	Reflex to IEF
SZ	ANY	Result
SS	ANY	Result
ZZ	$< 100$	Result
ZZ	$\geq 100$	<ol style="list-style-type: none"> <li>1. Repeat both total and proteotype.</li> <li>2. Technologist will call client for additional clinical information.</li> <li>3. If no clinical reason for elevation, order IEF.</li> </ol>

\*A1AT may be elevated during an acute phase reaction or in those receiving augmentation therapy.
