

***FBN1* Full Gene Sequencing with Deletion/ Duplication (MFBNG) Prior Authorization Ordering Instructions**

Mayo Clinic Laboratories is pleased to offer prior authorization services and third party billing on our *FBN1* Full Gene Sequencing with Deletion/Duplications, Varies (MFBNG). To utilize our prior authorization services on this test, you must follow the process as outlined below.

Ordering and Prior Authorization Process

Mayo Clinic Laboratories utilizes an extract and hold process for prior authorization. To order MFBNG with prior authorization services, complete this document as instructed below by insurance type. **You must order test code MFBNG and send the completed paperwork in with the sample.** The receipt of the paperwork and sample at Mayo Clinic Laboratories will trigger the extract and hold process and generate a request to the MCL Business Office to verify your patient's insurance coverage for the testing and begin any additional prior authorization services.

If the expected patient out-of-pocket expense is \$200 or less after prior authorization services, Mayo Clinic Laboratories will automatically proceed with MFBNG testing. If the expected patient out-of-pocket expense is greater than \$200, Mayo Clinic Laboratories will seek approval from the client contact listed on the Patient Demographics and Third Party Billing Information form **before proceeding** with MFBNG testing. The MCL Business Office offers interest-free payment plans on balances over \$200.

Commercial Insurance

For patients with commercial insurance, complete the following, staple them together and send with the specimen:

- Patient Demographics and Third Party Billing Information form (required)
- Letter of Medical Necessity (required)
- Copy of front and back of insurance card (if available)

Note: The Advanced Beneficiary Notice of Noncoverage (ABN) form is not required for commercial insurance-covered patients.

Medicare

For patients with Medicare, complete the following, staple them together and send with the specimen:

- Patient Demographics and Third Party Billing Information form (required)
- Advanced Beneficiary Notice of Noncoverage (ABN) form (required – see separate ABN form: MC2934-336)
- Copy of front and back of secondary insurance card (if applicable)

Attach the ABN form and copy of the secondary insurance card to the Patient Demographics and Third Party Billing Information form and send with the specimen.

Note: The Letter of Medical Necessity and a copy of the Medicare card are not required for Medicare-covered patients.

Medicaid

Mayo Clinic Laboratories may be able to file claims for your Medicaid-covered patients. Before ordering, contact the MCL Business Office at 800-447-6424 to discuss. Have the patient's Medicaid information available when calling.

Note: These instructions are subject to change at any time. Call the MCL Business Office at 800-447-6424 with any questions.

Attach the Following to This Completed Form

- Letter of Medical Necessity (required except for Medicare patients) – template provided on page 3
- Advanced Beneficiary Notice of Noncoverage (ABN) form (required for Medicare patients only) – see separate form: MC2934-336
 - Templates provided on the following pages
- Copy of front and back of patient's insurance card (if available)

Letter of Medical Necessity for *FBN1* Full Gene Sequencing with Deletion/Duplication (MFBNG) Testing

Patient Name (Last, First Middle) _____

Birth Date (mm-dd-yyyy) _____

Member Number _____

Group _____

ICD-10 Codes _____

To Whom It May Concern:

We are requesting preauthorization for the *FBN1* Full Gene Sequencing with Deletion/Duplication, Varies (MFBNG) performed by Mayo Clinic Laboratories for (insert patient name) _____

Patient's personal medical history is significant for _____

Patient's family history is significant for _____

Due to the patient's medical history, a diagnosis of Marfan syndrome is suspected and genetic testing is recommended.

Rationale: The use of genetic testing to aid in the diagnosis of Marfan syndrome is supported by experts in the field and summarized by the 2010 revised Ghent nosology for Marfan syndrome, "In order to avoid persistent ambiguity even under the proposed criteria, molecular testing should be strongly considered because it influences the clinical management."¹⁻³ Test results will have a direct impact on this patient's medical management, screening, and prevention of potential complications, including sudden cardiac death.

Genetic testing is used to confirm a diagnosis and/or identify at-risk individuals. This testing would allow for the unequivocal diagnosis of a gene variant causative of the patient's medical history, and would have significant implications for the patient's clinical management with regard to decision-making for ongoing imaging and surveillance, surgery, as well as medical management. For example, identification of a disease-associated *FBN1* variant would confirm the diagnosis of Marfan syndrome, and warrant ongoing echocardiographic screening to monitor the size of the aorta and prevent serious complications, such as aortic dissection. Additionally, identification of a disease-associated variant in *FBN1* would provide guidance regarding the best timing for surgical intervention on the aorta, given that different genes are known to have higher or lower risk of aortic dissection at different aortic dimensions. In summary, a positive genetic test result would provide a definitive cause for this patient's medical history and would ensure this patient is being treated appropriately.

A negative *FBN1* test result could also be informative. A negative result may help to reinforce that the patient does not have Marfan syndrome or, alternatively, it could indicate that additional genetic testing for genes known to cause similar disorders (*TGFBR1*, *TGFBR2*, *SMAD3*, *TGFB2*, *ACTA2*, etc) should be considered to assess for an alternate diagnosis and allow for gene-specific management and screening.

Marfan syndrome is inherited in an autosomal dominant fashion, and each child is at a 50% risk to inherit a causative variant from an affected parent. When a familial variant has been identified, genetic testing can identify family members who are not at increased risk to develop the complications and symptoms associated with Marfan syndrome. No other test can reliably differentiate unaffected family members, who do not require further health screening, from presymptomatic affected family members, who must be followed closely by a cardiologist.

Test requested: *FBN1* Full Gene Sequencing with Deletion/Duplication, Varies (MFBNG) is a cost-effective test that utilizes next-generation sequencing (NGS) to evaluate the *FBN1* gene for Marfan syndrome-associated variants.

Laboratory information: Testing would be performed at Mayo Clinic Laboratories (TIN# 411346366 / NPI# 1093792350), a CAP-accredited and CLIA-certified laboratory, using 2020 CPT code: 81408.

Thank you for your thoughtful consideration of our preauthorization request. We look forward to hearing back from you.

Sincerely,

Ordering Provider Name _____

Patient Name (First Middle Last)	MCL Order Number
----------------------------------	------------------

Advance Beneficiary Notice of Non-coverage (ABN)

Medicare doesn't pay for everything, even some care you or your health care provider think you need. **We expect Medicare may not pay for the item, test, service or care listed below.** If Medicare doesn't pay, you may have to pay.

Item, Test, Service or Care	Reason Medicare May Not Pay	Estimated Cost
MFBNG/FBN1 Full Gene Sequencing with Deletion/Duplication, Varies	Patient's personal and family history of cancer does not meet Medicare's medical necessity coverage criteria for this laboratory test.	\$2,350.00

What to do now

- Read this notice to make an informed decision about your care.
- Ask any questions you have.
- Choose one option below to let us know if you still want to get the item, test, service or care.

Choose ONE option below. We can't choose for you.
<p>If you choose Option 1 or 2, we may help you use any other insurance you might have, but Medicare can't require us to do this.</p> <p><input type="checkbox"/> OPTION 1: I want the item, test, service or care listed above, and I want Medicare to be billed for an official decision on payment, which I'll get on a Medicare Summary Notice (MSN). You can ask to be paid now. I understand that if Medicare doesn't pay, I'm responsible to pay, but I can appeal to Medicare by following the directions on the MSN. If Medicare does pay, you'll refund any payments I made to you, minus co-pays or deductibles.</p> <p><input type="checkbox"/> OPTION 2: I want the item, test, service or care listed above, but don't bill Medicare. You can ask to be paid now and I'm responsible to pay. I understand that I can't appeal, since Medicare isn't billed.</p> <p><input type="checkbox"/> OPTION 3: I don't want the item, test, service or care listed above. I understand I'm not responsible for payment and I can't appeal to see if Medicare would pay.</p>

Additional Information:

This notice gives our opinion, not an official Medicare decision. For other questions about this notice or Medicare billing, call 1-800-MEDICARE (1-800-633-4227). TTY users can call 1-877-486-2048. Signing below means you received and understand this notice. You can ask to get a copy.
