Encephalopathy, Interpretation, CSF

MCR

The following antibody was identified: Tripartite Motif-Containing Protein 46 (TRIM46)-IgG

- This profile supports a diagnosis of neurological autoimmunity.
- Considerations include cerebellar ataxia and encephalitis. A paraneoplastic basis should be considered. Considerations include neuroendocrine tumors such as small cell lung cancer.

None.

Result Name	Result	Unit	Reference Value	Performing Site
 TRIM46 Ab IFA, CSF 	Reactive		Negative	① MCR
Tissue based immunofluorescence screening was reactive, confirmation by antigen-specific reflex to follow. A reactive result indicates an immunofluorescence pattern suggestive of this antibody specificity, but confirmatory testing is necessary before being finalized.
