Hexosaminidase A and Tot, WBC/Mole

Hexosaminidase A and Total, WBC

19.0 nmol/min/mg

Low

MCR

Reference Value
≥20

Percent A

19 %

Low

MCR

Reference Value
20–80

MML Comment

MCR

These results indicate that this patient is affected with Tay-Sachs disease. The percentage of hexosaminidase A activity is reduced. Results of molecular reflex testing will follow.

A genetics consultation is recommended. In addition, the National Tay-Sachs and Allied Diseases Association (1–800–906–8723; <http://www.ntsad.org/>) provides information and support services for families and health care professionals.

Please contact the Biochemical Genetics consultant or genetic counselor on call (1–800–533–1710) if you have any questions.
