## Antithrombin Activity, P

Result Name	Value	Unit	Reference Value	Performing Site
Antithrombin Activity, P	102	%	80–130	1 MCR
Direct factor Xa inhibitor therapy (rivaroxaban (Xarelto), apixaban (Eliquis), edoxaban (Savaysa)) may interfere with the functional Xa based AT assay and cause an overestimation of AT activity thus potentially masking diagnosis of AT deficiency. Suggest clinical correlation and consider repeat AT testing remote from direct factor Xa inhibitor therapy, if clinically indicated.
