Introduction

MayoACCESS is an advanced test management solution that connects medical and clinical facilities to laboratories. This browser-based application provides an efficient ordering, tracking, and reporting system in which you can perform the following tasks:

- Ordering laboratory tests
- Entering and tracking patient information
- Printing laboratory results for patients
- Printing batch sheets and specimen labels
- Providing important notifications

System requirements

Below is a list of the recommended and minimum requirements for using MayoACCESS.

Operating system

MayoACCESS runs only on the Microsoft Windows 10 and Windows 11 operating systems.

- Recommended: 8 GB RAM
- **Minimum:** 4 GB RAM

Web browser

MayoACCESS must be run in Google Chrome or Microsoft Edge. Ensuring that the latest versions of Chrome and Edge are running is a good practice.

Mayo Clinic Laboratories websites

If access to external websites is restricted, contact your local Information Technology (IT) team or Help Desk and request that they provide access to the following websites:

- MayoACCESS production site: <u>https://mmlaccess.com</u>
- MayoACCESS test site: <u>https://test.mmlaccess.com</u>
- Mayo Clinic Laboratories: <u>https://mayocliniclabs.com</u>
- Sectra UniView (Digital Image Tech only): https://digitalpathview.mayocliniclabs.com
- Mayo Clinic Identity Management:
 - o https://account.mayoclinic.org
 - o https://idmpacprodmcauthsa.blob.core.windows.net

Computer setup for MayoACCESS

To set up MayoACCESS on a computer, perform the following tasks for each user of the computer, unless these are default security policies for all computers in your organization:

- Allow pop-ups in Microsoft Edge or Google Chrome.
- Review MayoACCESS printing options and choose either standard Windows printing or Sunquest Print Service. For definitions of these options, see <u>MayoACCESS printing overview</u>.
- Set up a label printer.

Below are the procedures for performing each of these tasks.

Allowing pop-ups in Microsoft Edge or Google Chrome

The use of MayoACCESS requires that pop-ups be allowed for both <u>https://mmlaccess.com</u> and <u>https://test.mmlaccess.com</u> in Chrome or Edge. You can define these settings at the enterprise level or manually. Contact your local IT team or Help Desk for assistance. If users have permissions to set pop-ups, they can visit the following links:

- Chrome: Block or allow pop-ups in Chrome
- Edge: <u>Block pop-ups in Microsoft Edge</u> (the user should scroll down to "How to allow pop-ups for a specific URL in Microsoft Edge")

MayoACCESS printing overview

Options

Printing in MayoACCESS can be done in one of two ways: standard Windows printing or Sunquest Print Service (SPS). Each site can choose one option only.

Standard Windows printing

As with other types of browser-based printing, you can print directly from your browser to the selected printer without performing any installations on local workstations. For each print job, select a printer and click the **Print** button. Use the Windows **Print** dialog box to specify the number of copies.

To print to PDF, you must provide a new document name or overwrite the previously printed file.

New sites will automatically default to standard Windows printing as of March 31, 2023. If your site has previously selected SPS and wants to convert to standard Windows printing, contact <u>Customer</u> <u>Service</u>.

Sunquest Print Service

SPS replaces the functionality previously provided by MeadCo ActiveX and Atlas Print Service (APS). It allows you to print silently from Chrome or Edge, meaning that you can print directly to the SPS default printer and the defined MayoAccess Label Printer without selecting a printer for each print job.

SPS must be installed on workstations from which users want to print MayoACCESS specimen labels, result reports, and batch sheets. The installation requires administrator rights.

If you are choosing the SPS option, follow the steps outlined below to complete the process:

- 1. Follow the instructions in <u>Installing Sunquest Print Service</u> to install SPS on every workstation at the site where MayoACCESS is used.
- 2. To allow users to install with administrator rights, contact the site IT team.
- 3. Allow the installation 10–15 minutes to complete on each workstation.
- 4. To activate your site configuration, contact <u>Customer Service</u>. Mayo Clinic Laboratories will activate both the test and production environments.

IMPORTANT: Your site configuration must be activated by Mayo Clinic Laboratories before you can begin using this print option.

Installing Sunquest Print Service

Important: To perform these tasks, you must be logged in to Microsoft Windows as an administrator.

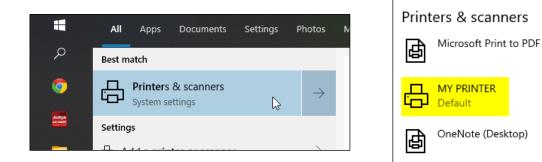

With SPS, documents are printed based on settings selected by the user during the installation process. This allows printing without Windows prompts on all workstations using MayoACCESS.

The instructions below on installation and setup of the SPS application can be performed at any time. However, Mayo Clinic Laboratories must activate site configuration before you can begin using SPS. Therefore, to set a date when your site will be configured for SPS, you must contact <u>Customer</u> <u>Service</u>. Ensure that the installation and setup steps are completed before the scheduled date of your site configuration.

Prerequisites

1. Promote yourself to be an administrator on the workstation. If you do not have permissions to do so on your workstation, contact your IT team or Help Desk for assistance with the installation.

2. MayoACCESS currently defaults to the workstation's default printer. To find the default printer, search for **Printers & scanners** in the Windows **Start** ⊞ menu (below, left). The default printer will be indicated as shown (below, right). Make a note of the default printer for reference during the installation process.

Downloading the install file

- 1. Go to https://mmlaccess.com/macf/implementation/aps/maaps.html.
- 2. Click Download Print Service Application MSI.

The install file is downloaded.

- 3. At top right of your browser's toolbar, click the arrow. 😔
- 4. Open the install file following the directions at these links:
 - Chrome: Download a file
 - Edge: How to manage downloads in Microsoft Edge

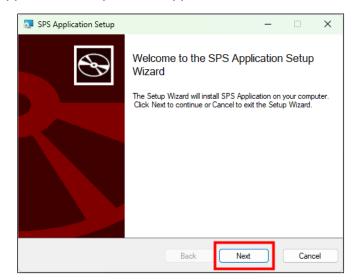

Installing the print service

- 1. In Windows Explorer, navigate to the default **Downloads** folder to find **SPSApplication.msi**.
- 2. Right-click SPSApplication.msi and select Install.

The installation begins.

Windows Installer	
Preparing to install	
	Cancel

3. When the SPS Application Setup Wizard appears, click the **Next** button.

In the **Add or modify application settings** dialog box, the **Port** and **Install Directory** fields will default.

SPS Application Setu	p	-		\times
Add or modify application	settings:		¢	Ð
Port	51001			
Install Directory	C:\Program Files (x86)\SPSApplication			
	Change			
	Back	stall	Cance	4

4. At bottom right, click the **Install** button. Install

The progress bar appears.

Installing SPS Application			
			\odot
Please wait while the Setup Wizard inst	alls SPS Applic	ation.	
Status: GenerateScript			
	Back	Next	Cancel

After installation is complete, the **Select Default Configurations** dialog box appears.

Select Default Configurations				Č	\mathbf{S}	
Default Printer				~		
Default PDF Directory	C: \Users\Public\SPSApp	olication\PDF			Brows	se
		Back	Next		Cano	el

- 5. Select a default printer.
 - Select the destination printer for MayoACCESS documents. This should be the default printer that you identified in the <u>Prerequisites</u> phase of installation.
 - To print to PDF, from the **Default Printer** drop-down menu, select **Sunquest Save as PDF**.

Sunquest Save as PDF creates a PDF file of the document you are trying to print. Instead of prompting you to name the document, the application names it and saves it to the default PDF folder you chose when you installed or edited the SPS configuration.

9. At bottom right, click the **Next** button. Next

The SPS Application Setup Wizard reappears with the message that setup has been completed.

10. To exit the wizard, click the **Finish** button.

Changing the default settings

The following tasks require the use of the printer icon **s** on the system tray in the Windows task bar, typically located in the bottom right corner of the screen (left).

Changing the default printer

To change the default printer for SPS:

1. Right-click the printer icon **[**] in the system tray. From the popup menu, select **Change Default Printer** (right).

Open Default PDF Directory Change Default PDF Directory			
Change Default Printer			
About			

The Printer Selection dialog box appears.

SPS Application - Print	ter Selection		×
Default Printer			
Sunquest Save as PDF			\sim
	Cancel	Set	

- 2. From the Default Printer drop-down menu, select the default printer.
- 3. At bottom right, click the **Set** button.

Changing the default PDF directory

To change the default PDF directory for SPS:

1. Right-click the printer icon **[]** in the system tray. From the popup menu, select **Change Default PDF Directory** (right).

The Default Directory Selection dialog box appears.

Open Default PDF Directory	_
Change Default PDF Directory	
Change Default Printer	
About	

SPS Application - Default Directory Sele	ection X
Default PDF Directory	
C:\Users\Public\SPSApplication\PDF	Browse
Cancel	Set

- 2. To the right of the **Default PDF Directory** field, click the **Browse** button **Browse** to find and select a directory.
- 3. At bottom right, click the **Set** button.

Opening the default PDF directory

When printing to PDF, you can open the default PDF directory in Windows File Explorer to view previously printed documents. Rightclick the printer icon in the system tray and, from the pop-up menu, select **Open Default PDF Directory** (right).

Open Default PDF Directory
Change Default PDF Directory
Change Default Printer

Setting up the label printer

To print labels, use the Zebra ZD 410 label printer, which Mayo Clinic Laboratories provides to you. Your operating system will find the driver for the Zebra ZD 410 printer and install it automatically. Then, you can configure the label printer.

Note: You can also use the Zebra label printer models LP 2824 and LP 2824 Plus. Setup instructions for older label printer models might differ from those shown below.

To configure the printer:

- 1. Plug the power cord into the printer and then into any AC outlet.
- 2. Use the provided Universal Serial Bus (USB) cable to connect the printer to the computer.
- 3. Turn the printer on.
- 4. Configure the label printer properties for the Zebra ZD410 printer:
 - In Windows 10:
 - a. From the Start 🖽 menu, select Settings. 🚳

- Windows Settings Find a setting Network & Internet Devices System Display, sound, notifications, Bluetooth, printers, mouse Wi-Fi, airplane mode, VPN power Personalization -Apps Accounts Lef 1 Background, lock screen, colors Uninstall, defaults, optional Your accounts, email, sync,
- b. In the Windows Settings window, select Devices.

c. On the right side of the **Devices** window, under **Related Settings**, click the **Devices and Printers** link.

- 2. Find and select the report you want to print.
- 3. On the left side of the SmartLinks Bar, click the **Report** SmartLink.
- 4. Ensure that the report is printed.

Tips

Tips

Below are tips for getting the most out of your Mayo Clinic online experience.

Checking your print option version

If you need to find out which version of Atlas Print Service or SPS you are running:

1. From the workstation's **Start** ⊞ menu, search for and select **Apps & features** (right).

Settings		
ô 3 Add or remove programs		>
E Apps & features	R	>

2. In the list that appears, click **ATLAS Print Service** or **SPSApplication**.

The installed version appears under the print option name.

ATLAS Print Service		182 MB
		3/14/2022
1.6.1.32		
	-	
	Modify	Uninstall
		- 19 C

Example view of old ATLAS Print Service

Example view of new SPSApplication

Confirming successful switch to and use of new print option

To confirm that your configuration has been switched and that you are now successfully using SPS or standard Windows printing:

- 1. Log in to MayoACCESS.
- 2. From the Help menu, select System Info Analyzer (right).

A MayoACCESS welcome screen appears.

Help	
Brows	er Settings Information
Help	
Print S	Screen
Syster	n Info Analyzer

MAYO C LABORA	CLINIC ATORIES	
	MayoACCESS ®	
	THANK YOU FOR USING MAYO CLINIC LABORATORIES	
User: <your b="" her<="" name=""> - SPS Print Service En: - SPS Print Service Po</your>	abled: Yes	
Download Print Service	e - Application MSI	
	Powered by ATLAS LabWorks®	

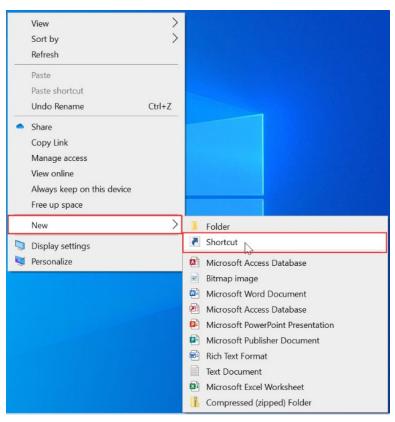

Page 26

- If the screen shows **Print Service Enabled: Yes** and **Print Service Port: 51001**, the site is configured for SPS as shown above.
- If the screen shows **Print Service Enabled: No**, the site is configured for standard Windows printing.

Creating a shortcut icon on the desktop

For quick access to the Mayo Clinic Laboratories website, you can add shortcuts to your computer desktop in Windows. To do so:

- 1. Right-click anywhere on your computer desktop.
- 2. From the pop-up menu, select New, and then Shortcut.

3. In the text field on the first screen of the **Create Shortcut** wizard, enter the uniform resource locator (URL) for the shortcut icon, in this case https://mayocliniclabs.com.

		×
\leftarrow	Create Shortcut	
	What item would you like to create a shortcut for?	
	This wizard helps you to create shortcuts to local or network programs, files, folders, computers, or Internet addresses.	
	Type the location of the item:	
	https://www.mayocliniclabs.com/ Browse	
	Click Next to continue.	
	Next Cance	4

- 4. At bottom right, click the **Next** button. Next
- 5. On the next screen of the wizard, enter the name for this shortcut. For example, enter "Mayo Clinic Laboratories".

			×
←	Create Shortcut		
	What would you like to name the shortcut?		
	Type a name for this shortcut:		
	Mayo Clinic Laboratories		
	Click Finish to create the shortcut.		
			Consel
		Finish	Cancel

6. To create the shortcut and exit the wizard, click the **Finish** button. Finish

Tips

The shortcut icon appears on your computer desktop (right).

7. Double-click this icon to go to https://mayocliniclabs.com.

Clearing the web browser cache

Regularly clearing the cache of your web browser by removing temporary internet files and cookies can help optimize application performance. Instructions for doing so in Google Chrome and Microsoft Edge can be found at the following links:

- Chrome: <u>Clear cache & cookies</u>
- Edge: How to manage and clear your cache and cookies

Troubleshooting

This section provides instructions on how to troubleshoot errors in SPS installation and specimen label printing.

SPS installation

If when logging into MayoACCESS you select a site that is configured to use SPS, but the print service is not installed, the following message appears:

Click the **Download ATLAS Workstation Setup** button Download ATLAS Workstation Setup and follow the instructions in Installing Sunquest Print Service.

If you are not logged into your workstation as an administrator, the following message appears, and the application is not installed:

If you do not have administrator access to your workstation, contact your IT team or Help Desk for assistance.

After installing SPS, check the installation through the 51001 local port by pasting the following URL into the browser address bar:

• http://localhost:51001/api/print/isalive

If SPS is installed properly, you will see the following message and HTML:

Two different implementations of SPS

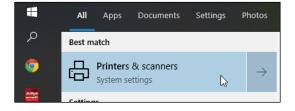

Testing has shown that the same implementation of SPS can be used for two different instances of Atlas. Therefore, if you use Sunquest Atlas for non-printing purposes (for example, outreach), you may not encounter any issues.

However, not every combination of SPS and Atlas has yet been tested. If you have any issues using both services in tandem, please contact your Atlas vendor representative.

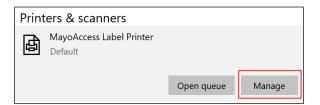

Specimen label printing

If specimen labels are cutting off on the last line, update the **MayoAccess Label Printer Printing Defaults**:

1. In the Windows Start 🖽 menu, search for Printers & scanners.

2. Select MayoAccess Label Printer and click the Manage button.

3. Click the Printer properties link.

Manage your device				
Printer status: Idle				
Open print queue	Set as default			
Print a test page				
Run the troubleshooter				
Printer properties				
Printing preferences				
Hardware properties				

4. In the **Printer properties** dialog box, select the **Advanced** tab and, at bottom left, click the **Printing Defaults...** button.

HayoACCESS Label Printer Properties				×

5. Change Height from	OK Cancel Apply Help 1.20 to 1.25 (right). Size Width: 2.00 Height: 1.25

6. To apply the change and close the dialog box, click the **OK** button.

Uninstalling Sunquest Print Service

If MayoACCESS is no longer needed on a workstation, you can uninstall the printing function.

Notes:

• If a workstation previously had SPS installed but then needed to uninstall it, you need not contact Customer Service to update the configuration because the configuration has already been updated.

• If your site previously had SPS installed but then needed to convert to standard Windows printing or vice versa, contact <u>Customer Service</u> for further assistance.

To uninstall SPS:

- 1. Promote yourself to be an administrator on the workstation. If you do not have permissions to do so on your workstation, contact your IT team or Help Desk for assistance with the installation.

Settings		
ळ Add or remove programs		>
E Apps & features	R	>

Both **ATLAS Print Service** and **SPSApplication** will appear in the results.

- 3. If **ATLAS Print Service** is currently installed, uninstall it as follows:
 - a. (Optional) Stop SPS. In the Start menu , search for and select Services. In the Services dialog box, right-click ATLAS Print Service and, from the pop-up menu, select Stop. This allows the next step to complete faster.
 - b. From the **Start** menu ⊞, search for and select **Apps & features** (right).

Settings		
or remove programs		>
E Apps & features		>

- c. In the Apps & features window, select ATLAS Print Service.
- d. Click the **Uninstall** button Uninstall <u>twice</u>.

A dialog box appears, providing two radio button options for stopping the APSClientMonitor.exe program.

The fello	wing applications shoul	d be closed before conti	ouina tha
install:	wing applications should	a be closed before conta	iding the

	is complete.	ons and attempt to restar	them after
O Do no	ot close applications. (A	Reboot may be required	l.)

- e. We recommend maintaining the default Automatically close applications and attempt to restart them after setup is complete option.
- f. To continue uninstalling ATLAS Print Service, click the **OK** button. OK

Once the uninstall is complete, ATLAS Print Service will no longer be listed in the Services window.

- g. In the Start menu III, search for and select Services. If ATLAS Print Service still appears, refresh the Services window.
- 4. If **SPSApplication** is currently installed, uninstall it as follows:

a.	From the Start menu 田, search for and	Settings	
	select Apps & features (right).	袋 Add or remove programs >	
		🗵 Apps & features	

- b. In the Apps & features window, select SPSApplication.
- c. Click the Uninstall button Uninstall twice.

2 1

A dialog box appears, providing two radio button options for stopping the

SPSApplication and SPSApplication.ClientMonitor programs.

SPSApplication SPSApplication Client Monitor			
Automatica setup is co	ally close applications mplete.	and attempt to restar	t them after

- d. We recommend maintaining the default **Automatically close applications and attempt to restart them after setup is complete** option.
- e. To continue uninstalling ATLAS Print Service, click the **OK** button.

Once the uninstall is complete, **SPSApplication** will no longer be listed in the **Services** window.

Sunquest Print Service command line installation

Note: This section is for IT department use only.

A command line is available for sites that have many workstations to be set up. Before running the command, promote yourself to be an administrator on the workstation. If you do not have permissions to do so on your workstation, contact your IT team or Help Desk for assistance with the installation.

- 1. When printing to PDF, select the Sunquest Save as PDF option.
- 2. Create the folder for PDFs so that all MayoACCESS users on that workstation have read and write permissions for it. This folder should always be defined in case it is needed in the future.

```
mkdir <local path for PDF printouts>
msiexec.exe /I "<path of the SPSApplication.msi >" /quiet
DEFAULTPRINTER="<name of the default printer>"
DEFAULTPDFDIRECTORY="<local path for PDF printouts>"
```

For example:

mkdir C:\MayoACCESS\SPS

```
msiexec.exe /I %USERPROFILE%\Downloads\SPSApplication.msi /quiet
DEFAULTPRINTER="Sunquest Save as PDF"
DEFAULTPDFDIRECTORY="C:\MayoACCESS\SPS"
```

- 3. To test the command line, remove the /quiet flag. This will cause dialog boxes and success messages to appear. The <local path for PDF printouts> is required.
- 4. Replace <path of the SPSApplication.msi> with the location of the downloaded SPSApplication.msi file.
- 5. <name of the default printer> must be a printer installed on the workstation. If you are unsure of the printer's name for the command line, run the install as shown in <u>Installing</u> <u>Sunquest Print Service</u>. The **Default Printer** drop-down menu will show the available values for **DEFAULTPRINTER**.
- 6. If you are using **Sunquest Save as PDF** as **DEFAULTPRINTER** for a group of users, be sure to communicate to the users that they can change the default printer to a physical printer.
- 7. The quiet install will not start the application. You can do so by opening **SPSApplication** on the public desktop. The application will start the next time a user logs in.

The install folder defaults to C:\Program Files (x86)\SPSApplication.

For assistance, contact <u>Customer Service</u>.
