---

**Reporting Title:** Endometrial Stromal Tumor, FISH, Ts

**Performing Location:** Mayo Clinic Laboratories - Rochester Main Campus

### Ordering Guidance:

This test does not include a pathology consultation. If a pathology consultation is requested, order PATHC / Pathology Consultation, and appropriate testing will be added at the discretion of the pathologist and performed at an additional charge.

Multiple oncology (cancer) gene panels are also available. For more information see [Hematology, Oncology, and Hereditary Test Selection Guide](#)

This test is **not intended for** male patients.

### Additional Testing Requirements:

Confirmation testing for the presence of a possible JAZF1, PHF1, or YWHAE fusion transcript by next-generation sequencing to resolve atypical or unbalanced fluorescence in situ hybridization results is available, order MCSRC / MayoComplete Comprehensive Sarcoma Panel, Next-Generation Sequencing, Tumor or MCRSP / MayoComplete Targeted RNA Sequencing Panel, Next-Generation Sequencing, Tumor.

### Shipping Instructions:

Advise Express Mail or equivalent if not on courier service.

### Necessary Information:

**1. A pathology report is required for testing to be performed.** If not provided, appropriate testing and/or interpretation may be compromised or delayed. Acceptable pathology reports include working drafts, preliminary pathology, or surgical pathology reports.

**2. The following information must be included in the report provided.**

- Patient name
- Block number - must be on all blocks, slides, and paperwork
- Date of collection
- Tissue source

**3. A reason for testing must be provided.** If this information is not provided, an appropriate indication for testing may be entered by Mayo Clinic Laboratories.

### Specimen Requirements:

**Submit only 1 of the following specimens:**

#### Preferred:

**Specimen Type:** Tissue block (fresh tissue is **not acceptable**)

#### Collection Instructions:

1. Submit a formalin-fixed, paraffin-embedded tumor tissue block.
2. Blocks prepared with alternative fixation methods (eg, Prefer, Bouin's) will be attempted but are less favorable for successful results. Provide fixation method used.

#### Additional Information:

1. Paraffin-embedded specimens can be from any anatomic location (skin, soft tissue, lymph node, etc).
2. Decalcified paraffin-embedded specimens will have testing attempted; however, the success rate is approximately
