

Mayo Clinic Laboratories is pleased to offer prior authorization services and third party billing on our Hereditary Colon Cancer Multi-Gene Panel, Varies (HCRC). To utilize our prior authorization services on this test, you must follow the process as outlined below.

Ordering and Prior Authorization Process

Mayo Clinic Laboratories utilizes an extract and hold process for prior authorization. To order HCRC with prior authorization services, complete this document as instructed below by insurance type. **You must order test code HCRC and send the completed paperwork in with the sample.** The receipt of the paperwork and sample at Mayo Clinic Laboratories will trigger the extract and hold process and generate a request to the MCL Business Office to verify your patient's insurance coverage for the testing and begin any additional prior authorization services.

If the expected patient out-of-pocket expense is \$200 or less after prior authorization services, Mayo Clinic Laboratories will automatically proceed with HCRC testing. If the expected patient out-of-pocket expense is greater than \$200, Mayo Clinic Laboratories will seek approval from the client contact listed on the Patient Demographics and Third Party Billing Information form **before proceeding** with HCRC testing. The MCL Business Office offers interest-free payment plans on balances over \$200.

Commercial Insurance

For patients with commercial insurance, complete the following, staple them together and send with the specimen:

- Patient Demographics and Third Party Billing Information form (required)
- Letter of Medical Necessity (required)
- Copy of front and back of insurance card (if available)

Note: The Advanced Beneficiary Notice of Noncoverage (ABN) form is not required for commercial insurance-covered patients.

Medicare

For patients with Medicare, complete the following, staple them together and send with the specimen:

- Patient Demographics and Third Party Billing Information form (required)
- Advanced Beneficiary Notice of Noncoverage (ABN) form (required – see separate ABN form: MC2934-189)
- Copy of front and back of secondary insurance card (if applicable)

Attach the ABN form and copy of the secondary insurance card to the Patient Demographics and Third Party Billing Information form and send with the specimen.

Note: The Letter of Medical Necessity and a copy of the Medicare card are not required for Medicare-covered patients.

Medicaid

Mayo Clinic Laboratories may be able to file claims for your Medicaid-covered patients. Before ordering, contact the MCL Business Office at 800-447-6424 to discuss. Have the patient's Medicaid information available when calling.

Note: These instructions are subject to change at any time. Call the MCL Business Office at 800-447-6424 with any questions.

Group _____

ICD-10 Codes _____

To Whom It May Concern:

We are requesting preauthorization for the Hereditary Colon Cancer Multi-Gene Panel, Varies (HCRC) performed by Mayo Clinic Laboratories for (insert patient name) _____

Patient's personal medical history is significant for _____

Patient's family history is significant for _____

Due to the patient's (medical or family) history, a hereditary cancer predisposition syndrome is suspected and genetic testing is recommended.

Rationale: The American Society of Clinical Oncology recommends that genetic testing be offered to individuals with suspected inherited cancer risk in which test results will aid in medical management decision-making (ASCO Policy Statement Update: genetic testing for cancer susceptibility. J Clin Oncol 2003;21[12]:2397-2406). Because an aggressive approach to medical management is necessary for individuals identified as having a genetic mutation, test results are important in reducing cancer risk and promoting early cancer detection.

A positive result would indicate that the patient has an inherited predisposition to cancer and could help guide treatment strategies and allow for surveillance of associated organ systems known to be of increased risk for cancer. Specific screening recommendations are dependent on the gene and hereditary cancer predisposition syndrome implicated. For example, individuals found to carry a genetic mutation associated with Lynch syndrome would be at higher risk for synchronous or metachronous colorectal cancers as well as bladder, endometrial, ovarian, bile duct, gastric, and other cancers. A positive test result would allow the utilization of appropriate screening guidelines (ie, National Comprehensive Cancer Center Clinical Practice Guidelines in Oncology) and help guide decisions toward possible preventative measures, such as colectomy, hysterectomy, and oophorectomy as relevant.

Test requested: HCRC / Hereditary Colon Cancer Multi-Gene Panel, Varies is a cost-effective test that utilizes next-generation sequencing (NGS), array comparative genomic hybridization (aCGH), and other technologies to evaluate multiple genes for pathogenic mutations and deletions associated with colorectal cancer predisposition syndromes, including: APC, MLH1, MSH2, MSH6, PMS2, EPCAM, PTEN, MUTYH, STK11, TP53, CHEK2, SMAD4, BMPR1A, AXIN2, MLH3, GREM1, and CDH1.

Laboratory information: Testing would be performed at Mayo Clinic Laboratories (TIN# 411346366 / NPI# 1093792350), a CAP-accredited and CLIA-certified laboratory, using 2020 CPT code: 81435.

Thank you for your thoughtful consideration of our preauthorization request. We look forward to hearing back from you.

Sincerely,
