

# **Test Definition: DCTR**

Direct Antiglobulin Test (Polyspecific), Blood

# Overview

### **Useful For**

Demonstrating in vivo coating of red blood cells with IgG or the complement component C3d in the following settings: -Autoimmune hemolytic anemia

-Hemolytic transfusion reactions

-Drug-induced hemolytic anemia

#### **Reflex Tests**

| Test Id | Reporting Name           | Available Separately | Always Performed |
|---------|--------------------------|----------------------|------------------|
| DATR    | Direct Antiglobulin Tst  | No                   | No               |
|         | (Poly)                   |                      |                  |
| DC3TR   | Direct Antiglobulin Test | No                   | No               |
|         | (C3)                     |                      |                  |
| DIGTR   | Direct Antiglobulin Test | No                   | No               |
|         | (IgG)                    |                      |                  |

### **Testing Algorithm**

When the direct antiglobulin test (DAT) result is positive, the DAT test will be interpreted as "Invalid – See addl testing" and the polyspecific DAT test will be performed.

When polyspecific DAT result is positive, then DAT complement 3 and DAT IgG tests will be performed at an additional charge.

# Method Name

Hemagglutination

# NY State Available

No

# Specimen

Specimen Type Whole Blood EDTA

Shipping Instructions Specimen must arrive within 48 hours of collection.

Specimen Required Container/Tube: Pink top (EDTA)

# **Test Definition: DCTR**

Direct Antiglobulin Test (Polyspecific), Blood

#### Specimen Volume: 6 mL

#### Collection Instructions:

1. Invert several times to mix blood.

2. Send whole blood specimen in original tube. **Do not aliquot.** 

### **Specimen Minimum Volume**

3 mL; Neonates: EDTA Micro tube 0.5 mL

#### Reject Due To

| Gross     | ОК |
|-----------|----|
| hemolysis |    |

### Specimen Stability Information

| Specimen Type    | Temperature         | Time     | Special Container |
|------------------|---------------------|----------|-------------------|
| Whole Blood EDTA | Ambient (preferred) | 48 hours |                   |
|                  | Refrigerated        | 48 hours |                   |

# Clinical & Interpretive

# **Clinical Information**

IgG antibody or complement components secondary to the action of IgM antibody may be present on the patient's own red blood cells (RBC) or on transfused RBC.

#### **Reference Values**

Negative

#### Interpretation

Negative: No IgG antibody or complement (C3d) detected on the surface of the red cell. Positive: Test polyspecific direct antiglobulin testing will be ordered and performed.

#### Cautions

Autoimmune hemolytic anemia can occasionally occur with a negative direct antiglobulin test.

The direct antiglobulin test can be positive in some apparently healthy individuals.

#### **Clinical Reference**

Cohn CS, Delaney DO, Johnson ST, Katz LM, Schwartz J, eds. Technical Manual. 21st ed. AABB; 2023

# Performance

#### **Method Description**

# **Test Definition: DCTR**

# Direct Antiglobulin Test (Polyspecific), Blood

Antihuman globulin reacts with red cell-bound immunoglobulins to produce agglutination.(Cohn CS, Delaney M, Johnson ST, Katz LM, Schwartz J, eds. Technical Manual. 21st ed. AABB; 2023)

#### PDF Report

No

# Day(s) Performed

Monday through Sunday

**Report Available** Same day/1 to 2 days

Specimen Retention Time 14 days

# **Performing Laboratory Location**

Mayo Clinic Laboratories - Rochester Main Campus

# Fees & Codes

#### Fees

- Authorized users can sign in to <u>Test Prices</u> for detailed fee information.
- Clients without access to Test Prices can contact <u>Customer Service</u> 24 hours a day, seven days a week.
- Prospective clients should contact their account representative. For assistance, contact <u>Customer Service</u>.

# **Test Classification**

This test has been cleared, approved, or is exempt by the US Food and Drug Administration and is used per manufacturer's instructions. Performance characteristics were verified by Mayo Clinic in a manner consistent with CLIA requirements.

# **CPT Code Information**

86880
