Circulating Immune Complex, C1q Binding

Serum	Frozen	14 days	

### **Clinical & Interpretive**

#### **Reference Values**

Less than or equal to 3.9 ug Eq/mL

## Interpretation

Less than or equal to 3.9 ug Eq/mL is considered negative for circulating complement binding immune complexes.

Circulating immune complexes may be found without any evident pathology and positive results do not necessarily implicate the immune complex in a disease process.
