

Dermatopathology Consultation, Wet Tissue

# Overview

## **Useful For**

Histologic diagnosis and differential diagnosis of cutaneous diseases

#### **Reflex Tests**

Test Id	Reporting Name	Available Separately	Always Performed
LEV2P	Level 2 Gross and	No	No
	microscopic		
LEV3P	Level 3 Gross and	No	No
	microscopic		
LEV4P	Level 4 Gross and	No	No
	microscopic		

## **Testing Algorithm**

Laboratory approval is required prior to ordering this test. Contact Mayo Clinic Laboratories at 800-533-1710.

When this test is ordered, 1 of the 3 reflex tests will be performed at an additional charge. Appropriate additional stains and other ancillary testing may also be performed, at an additional charge, to determine a diagnosis.

For more information see Pathology Consultation Ordering Algorithm

## **Special Instructions**

• Pathology Consultation Ordering Algorithm

## **Highlights**

Our consultative practice strives to provide the highest quality diagnostic consultative service, balancing optimal patient care with a cost-conscious approach that supports the rapid turnaround time for diagnostic results.

# **Method Name**

Formalin-fixed tissues: Process/Embed

Serial sections: Hematoxylin and Eosin Stain/Light Microscopy

## **NY State Available**

Yes

# **Specimen**

# Specimen Type

Tissue

Dermatopathology Consultation, Wet Tissue

# **Ordering Guidance**

**This test is only for a dermatopathology wet tissue consultation**. For a dermatologic consultation on paraffin embedded tissue and slides, order PATHC / Pathology Consultation.

## **Shipping Instructions**

Attach the green "Attention Pathology" address label (T498) to the outside of the transport container before putting into the courier mailer.

## **Necessary Information**

All requisition and supporting information must be submitted in English.

## Each of the following items is required:

- 1. All requisitions must be labeled with:
- -Patient name, date of birth and medical record number
- -Name and phone number of the referring pathologist or ordering physician
- -Anatomic site and collection date
- 2. A brief patient history is essential to achieve a consultation fully relevant to the ordering clinician's needs.
- 3. Preliminary diagnosis or differential diagnosis
- **4. Clinical and/or dermoscopic images should be included if available.** Submit with the request via Epic Care Everywhere, Mayo Clinic Image Share, or external storage device.

## Specimen Required

Supplies: Dermatopathology Media (T101)

Sources: Skin or oral mucosa

Container/Tube: Screw-capped container or vial containing 10% formalin

Specimen Volume: Entire specimen

**Collection Instructions: For scalp biopsies: when the differential diagnosis includes a scarring alopecia, 2 separate 4-mm punch biopsies are recommended** (1 for vertical and 1 for horizontal sections). If a single scalp biopsy is received with the clinical diagnosis of a scarring alopecia, the specimen will be processed with horizontal sections.

Additional Information: STAT requests are not accepted for this test.

## **Specimen Minimum Volume**

Size needed depends on diagnosis and size of lesion.

# Reject Due To

All specimens will be evaluated at Mayo Clinic Laboratories for test suitability.

## **Specimen Stability Information**

Specimen Type	Temperature	Time	Special Container
Tissue	Ambient		

# Clinical & Interpretive

# Dermatopathology Consultation, Wet Tissue

# **Clinical Information**

Dermatopathology involves histologic examination of skin biopsy and oral mucosal specimens.

## **Reference Values**

Diagnosis and description of microscopic findings

# Interpretation

Histologic diagnosis is based primarily on interpretation of hematoxylin and eosin-stained sections. Special histochemical stains, such as alcian blue, Giemsa, or periodic acid-Schiff, may be necessary in some cases.

Interpretation is based on evaluation of patterns including architectural and cytologic details, which are included in a microscopic description.

## **Cautions**

Specific diagnosis may require correlation with clinical information.

## **Clinical Reference**

- 1. Lever WF, Schaumburg-Lever G. Histopathology of the Skin. 7th ed. JB Lippincott; 1990
- 2. Elder D, Elenitsas R, Ioffreda M, et al, eds. Atlas of Dermatopathology: Synopsis and Atlas of Lever's Histopathology of the Skin. 4th ed. Lippincott Williams and Wilkins; 2020

#### **Performance**

## **Method Description**

Formalin-fixed, paraffin-embedded skin biopsy sections are stained and interpreted utilizing a bright-field microscope. (Elder DE, Elenitsas R, Rosenbach M, Murphy GF, Ruben AL, Xu X, eds. Lever's Histopathology of the Skin. 11th ed. Lippincott Williams and Wilkins; 2019)

## **PDF Report**

No

# Day(s) Performed

Monday through Friday

#### Report Available

3 to 5 days: Cases requiring additional material or ancillary testing may require additional time.

# **Specimen Retention Time**

Indefinitely

## Performing Laboratory Location

Mayo Clinic Laboratories - Rochester Main Campus

Dermatopathology Consultation, Wet Tissue

# **Fees & Codes**

## **Fees**

- Authorized users can sign in to <u>Test Prices</u> for detailed fee information.
- Clients without access to Test Prices can contact <u>Customer Service</u> 24 hours a day, seven days a week.
- Prospective clients should contact their account representative. For assistance, contact <u>Customer Service</u>.

## **Test Classification**

Not Applicable

## **CPT Code Information**

88302 (if appropriate)

88304 (if appropriate)

88305 (if appropriate)
