

Barbiturates Confirmation, Random, Urine

#### **Overview**

#### **Useful For**

Detecting drug abuse involving barbiturates such as amobarbital, butalbital, pentobarbital, phenobarbital, and secobarbital

#### **Special Instructions**

• Clinical Toxicology CPT Code Client Guidance

#### **Method Name**

Gas Chromatography Mass Spectrometry (GC-MS)

#### **NY State Available**

Yes

# **Specimen**

# **Specimen Type**

Urine

#### **Ordering Guidance**

For situations where chain of custody is required, a Chain-of-Custody Kit (T282) is available. For chain-of-custody testing, order BARBX / Barbiturates Confirmation, Chain of Custody, Random, Urine.

Additional drug panels and specific requests are available. Call 800-533-1710 or 507-266-5700.

## **Additional Testing Requirements**

If urine creatinine is required or adulteration of the sample is suspected, also order ADULT / Adulterants Survey, Random, Urine in addition to this test.

## **Specimen Required**

Supplies: Urine Tubes, 10 mL (T068)

**Collection Container/Tube:** Plastic urine container **Submission Container/Tube:** Plastic, 10-mL urine tube

**Specimen Volume:** 10 mL **Collection Instructions:** 

- 1. Collect a random urine specimen.
- 2. No preservative.

#### **Additional Information:**

- 1. No specimen substitutions.
- 2. STAT requests are not accepted for this test.

#### **Forms**

Barbiturates Confirmation, Random, Urine

If not ordering electronically, complete, print, and send a Therapeutics Test Request (T831) with the specimen.

# Specimen Minimum Volume

5 mL

#### Reject Due To

Gross	ОК
hemolysis	
Gross icterus	ОК

# **Specimen Stability Information**

Specimen Type	Temperature	Time	Special Container
Urine	Refrigerated (preferred)	14 days	
	Ambient	72 hours	
	Frozen	14 days	

# **Clinical & Interpretive**

#### **Clinical Information**

Barbiturates represent a class of drugs that were originally introduced as sleep inducers. Butalbital is also used to control severe headaches. Mephobarbital and phenobarbital are frequently used to control major motor (grand mal) seizures. These drugs are commonly abused as "downers" to induce sleep after an amphetamine- or cocaine-induced "high."

## **Reference Values**

Negative (Positive results are reported with a quantitative result)

Cutoff concentrations by gas chromatography mass spectrometry:

Butalbital: 100 ng/mL

Amobarbital: 100 ng/mL

Pentobarbital: 100 ng/mL

Secobarbital: 100 ng/mL

Phenobarbital: 100 ng/mL

## Interpretation

The presence of a barbiturate in urine indicates use of one of these drugs.

Most of the barbiturates are fast acting; their presence indicates use within the past 3 days.

Phenobarbital, commonly used to control epilepsy, has a very long half-life. The presence of phenobarbital in urine indicates that the patient has used the drug sometime within the past 30 days.

Barbiturates Confirmation, Random, Urine

#### **Cautions**

No significant cautionary statements.

#### **Performance**

#### **Method Description**

Gas chromatography mass spectrometry confirmation with quantitation.(Unpublished Mayo method)

#### **PDF Report**

No

# Day(s) Performed

Monday, Wednesday, Friday

#### Report Available

3 to 5 days

# **Specimen Retention Time**

14 days

#### **Performing Laboratory Location**

Mayo Clinic Laboratories - Rochester Superior Drive

#### **Fees & Codes**

#### **Fees**

- Authorized users can sign in to <u>Test Prices</u> for detailed fee information.
- Clients without access to Test Prices can contact <u>Customer Service</u> 24 hours a day, seven days a week.
- Prospective clients should contact their account representative. For assistance, contact <u>Customer Service</u>.

# **Test Classification**

This test was developed and its performance characteristics determined by Mayo Clinic in a manner consistent with CLIA requirements. It has not been cleared or approved by the US Food and Drug Administration.

#### **CPT Code Information**

G0480

80345 (if appropriate for select payers)
