

# **Test Definition: FBART**

Bartonella Antibody Panel, IFA CSF

# **Overview**

#### **Profile Information**

Test Id	Reporting Name	Available Separately	Always Performed
FBHEN	Bartonella Henselae Ab	No	Yes
	Panel (CSF)		
FBARQ	Bartonella Quintana Ab	No	Yes
	Panel (CSF)		

#### **Method Name**

Immunofluorescence Assay (IFA)

#### **NY State Available**

Yes

# **Specimen**

# **Specimen Type**

**CSF** 

# Specimen Required Specimen Type: Spinal Fluid

Sources: CSF

Container/Tube: Sterile container

Specimen Volume: 1 mL

Collection Instructions: Collect 1 mL of spinal fluid (CSF). Ship refrigerate

### **Specimen Minimum Volume**

0.15 mL

# Reject Due To

Gross	Reject
Hemolysis	
Gross Icterus	Reject
Other	Specimens other than CSF

# **Specimen Stability Information**

Specimen Type Temperature	Time	Special Container
---------------------------	------	-------------------

# **Test Definition: FBART**

Bartonella Antibody Panel, IFA CSF

CSF	Refrigerated (preferred)	14 days	
	Ambient	7 days	
	Frozen	30 days	

## Clinical & Interpretive

#### **Reference Values**

REFERENCE RANGE: <1:1

**INTERPRETIVE CRITERIA:** 

<1:1 Antibody Not Detected

> or = 1:1 Antibody Detected

Infection with *Bartonella henselae* has been associated with cat scratch disease, bacillary angiomatosis, peliosis hepatis and febrile bacteremia syndrome. Infection with *Bartonella quintana* has been associated with trench fever and bacillary angiomatosis in both HIV positive and negative individuals.

IgG crossreactivity between *B. henselae* and *B. Quintana* may occur at any titer; however, the infecting species will typically have the higher IgG titer. Crossreactivity of IgM between the two species is limited and typically is not seen.

Diagnosis of infections of the central nervous system can be accomplished by demonstrating the presence of intrathecally-produced specific antibody. However, interpreting results is complicated by low antibody levels found in CSF, passive transfer of antibody from blood, and contamination via bloody taps.

#### **Performance**

#### **PDF Report**

No

#### Day(s) Performed

Monday through Saturday

#### Report Available

3 to 7 days

#### **Performing Laboratory Location**

**Quest Diagnostics** 

#### **Fees & Codes**

# **Test Definition: FBART**

Bartonella Antibody Panel, IFA CSF

#### **Fees**

- Authorized users can sign in to <u>Test Prices</u> for detailed fee information.
- Clients without access to Test Prices can contact <u>Customer Service</u> 24 hours a day, seven days a week.
- Prospective clients should contact their account representative. For assistance, contact <u>Customer Service</u>.

#### **Test Classification**

This test was developed and its analytical performance characteristics have been determined by Quest Diagnostics Infectious Disease. It has not been cleared or approved by the U.S. Food and Drug Administration. The FDA has determined that such clearance or approval is not necessary. This assay has been validated pursuant to the CLIA regulations and is used for clinical purposes.

#### **CPT Code Information**

86611 x 4

#### **LOINC®** Information

Test ID	Test Order Name	Order LOINC® Value
FBART	Bartonella Antibody Panel, IFA (CSF)	Not Provided
