

Hepatitis B Virus Surface Antigen, Quantitative, Serum

Test ID: HBAGQ

Explanation:

Due to reagent supply issues, this test will be made non-orderable, effective immediately.

Note:

Clients with pending specimens at Mayo Clinic Laboratories will be contacted for testing options.

Recommended Alternative Test:

Hepatitis B Surface Antigen, Quantitative, Monitoring (Not for Diagnosis)

Test ID: ZW83, Referral Lab Code 94333

Methodology: Immunometric Immunoassay

Note:

1. This test utilizes reagents and instrument platform that are different from those used at Mayo Clinic Laboratories for this analyte. Providers should use caution when interpreting serial results from “monitoring” tests using different test methods.
2. This test quantifies HBsAg levels in serum down to 0.05 IU/mL, compared to 0.005 IU/mL level quantifiable with the Mayo Clinic Laboratories test.

Reference Values:

<0.05 IU/mL

Specimen Requirements:

Specimen Type: Serum

Preferred: Red top

Acceptable: SST

Specimen Volume: 2 mL

Collection Instructions: Draw blood in a plain, red-top tube(s). Serum gel tube is acceptable.

Minimum Volume: 1 mL

Specimen Stability Information:

Specimen Type	Temperature	Time
Serum	Frozen	30 days
	Refrigerate	14 days

CPT Code:

87467

Miscellaneous Referral Test Fee:

\$135.00

Day(s) Performed: Monday through Saturday

Report Available: 3 to 7 days
