

Alpha-Globin Gene Analysis, Varies

Test ID: ATHAL

Explanation: Due to technical limitations, this assay will no longer include the two non-deletional mutations Constant Spring and alphaT Saudi. A new supplemental method to detect these two variants will be added in the near future.

Please consider ordering Alpha Globin Gene Sequencing (test ID: WASEQ) for the detection of non-deletion types of mutations, such as alphaT Saudi and Constant Spring, if clinically indicated.
