

cobas PCR Urine Sample Kit

T#: T903

Explanation:

cobas PCR Urine Sample Kit, Mayo Supply T903, is now available for order and should be used for the test below. Please consult the online Mayo Clinic Laboratories test catalog for the most up-to-date test information.

Test(s):

UBKQN - BK Virus DNA Detection and Quantification, Random, Urine ([to be implemented July 27th, 2021](#)).

Caution:

The cobas PCR Media tube in this kit contains guanidine hydrochloride. Do not allow the tube to come in direct contact with sodium hypochlorite (bleach) or other highly reactive reagents such as acids and bases. These mixtures can release a noxious gas.

Note(s):

This urine sample kit is required for submission of samples for the listed test. Alternatives will not be accepted.
