

Hypersensitivity Pneumonitis Panel

Test ID: FHSPP

Explanation:

Per notification received from Eurofins Viracor Laboratory, new Test ID, FHSPP, will not go live today, 4/15/2022, due to reagent unavailability for the Laceyella sacchari assay test result. Because of this, test ID FHPP2- Hypersensitivity Pneumonitis FEIA Panel II, will remain orderable; however, the Thermoactinomyces vulgaris IgG component is still unavailable for an indeterminate period of time. Eurofins Viracor Laboratory will release results of all components of the profile except for the Thermoactinomyces vulgaris IgG, which will be cancelled. The fee of \$138.60 reflects the price adjustment for not running this component.
