

## Bath Salts Panel (Qualitative), Urine

**Explanation:** The following new orderable, referred to NMS Labs, will be available on May 2, 2022.

**Test ID:** FBSQU

**Method:**

High Performance Liquid Chromatography/Tandem Mass Spectrometry (LC-MS/MS)

**Reference Values:**

Reporting limit determined each analysis.

alpha-PHP/alpha-PiHP      None Detected      ng/mL

Alpha-PHP and alpha-PiHP (alpha-Pyrrolidinoheptaphenone, alpha-Pyrrolidinohexanophenone, alpha-Pyrrolidinoisohexanophenone) are psychoactive stimulants of the pyrrolidinophenone series that are structurally related to alpha-PVP. These compounds have been sold as novel psychoactive substances (NPS) for their stimulating and empathogenic effects and are used as alternatives to amphetamine, MDMA, and/or cocaine. Alpha-PHP and its isomer alpha-PiHP are not differentiated. If additional testing is needed, please contact the laboratory.

4-chloro alpha-PVP      None Detected      ng/mL

4-chloro alpha-PVP (4-chloro-alpha-pyrrolidinovalerophenone) is a psychoactive stimulant of the pyrrolidinophenone series that is structurally related to alpha-PVP. This compound has been sold as a novel psychoactive substance (NPS) for its stimulating and empathogenic effects and is used as an alternative to amphetamine, MDMA, and/or cocaine.

Eutylone      None Detected      ng/mL

Eutylone is classified as a synthetic stimulant and belongs to the beta-keto-methylenedioxyamphetamine subclass, which includes synthetic stimulants methylone, butylone, ethylone, and N-ethylpentylone.

Benzylone      None Detected      ng/mL

Benzylone is classified as a synthetic stimulant and belongs to the beta-keto-

methylenedioxyamphetamine subclass, which includes synthetic stimulants methylone, butylone, ethylone, and N-ethylpentylone.

N-butyl Pentylone                      None Detected    ng/mL

N-butyl Pentylone is classified as a synthetic stimulant and belongs to the beta-ketomethylenedioxyamphetamine subclass, which includes synthetic stimulants methylone, butylone, ethylone, and N-ethylpentylone.

### Specimen Requirements:

**Specimen Type:** Urine

**Container/Tube:** Plastic preservative-free urine container

**Specimen Volume:** 2 mL

**Collection Instructions:** Collect 2 mL random urine without preservative. Send specimen refrigerated in a plastic, preservative-free urine container.

**Minimum Volume:** 0.7 mL

### Specimen Stability Information:

Specimen Type	Temperature	Time
Urine	Refrigerated (preferred)	30 days
	Ambient	7 days
	Frozen	30 days

**Fee:**  
\$139.00

**CPT Code(s):**  
80371

**Day(s) Setup:** Monday through Sunday

**Report Available:** 9 - 13 days
