

## MayoComplete Colorectal Cancer Panel, Next-Generation Sequencing, Tumor

**Test ID:** MCCRC

**Explanation:** On the effective date, the following genes will be added to panel: *PIK3CA*, *PIK3R1*, *POLE* and *PTEN* genes

Current Genetics Information	New Genetics Information
<p>This test uses targeted next-generation sequencing to determine microsatellite instability status and to evaluate for somatic mutations within the <i>APC</i>, <i>BRAF</i>, <i>HRAS</i>, <i>KRAS</i>, <i>MLH1</i>, <i>MSH2</i>, <i>MSH6</i>, <i>NRAS</i>, and <i>PMS2</i> genes. See <a href="#">Targeted Genes and Methodology Details for MayoComplete Colorectal Cancer Panel</a> for details regarding the targeted gene regions evaluated by this test.</p> <p>This test is performed to evaluate for somatic mutations within solid tumor samples. It <b>does not assess</b> for germline alterations within the genes listed.</p>	<p>This test uses targeted next-generation sequencing to determine microsatellite instability status and to evaluate somatic mutations within the <i>APC</i>, <i>BRAF</i>, <i>HRAS</i>, <i>KRAS</i>, <i>MLH1</i>, <i>MSH2</i>, <i>MSH6</i>, <i>NRAS</i>, <b><i>PIK3CA</i></b>, <b><i>PIK3R1</i></b>, <i>PMS2</i>, <b><i>POLE</i></b> and <b><i>PTEN</i></b> genes.
