

Antimicrobial Susceptibility Panel, Yeast, Varies

Test ID: MMLYP

Explanation: Due to reagent performance issues, we are temporarily unable to report amphotericin B for *Candida glabrata* isolates. We expect this to last for 2-3 months and will provide an update when standard reporting resumes. If the clinical situation warrants, amphotericin B testing can be ordered and will be forwarded to U.T. Health Science Ctr San Antonio under test code: FAMBS / Amphotericin B Susceptibility Testing.
