

Primary Membranous Nephropathy Diagnostic Cascade, Serum

Test ID: PMND1

Explanation:

Due to reagent supply issues, results will be delayed past the published turnaround time for specimens requiring the PLA2I Immunofluorescence, reflex test. Specimens where the PLA2I reflex is not indicated will be reported within published turnaround time. PLA2I specimens will be stabilized and processed in the order they were received. The duration of the delay is expected to be <14 days. An update will be provided when PLA2I testing resumes.
