

## Fentanyl with Metabolite Confirmation, Chain of Custody, Random, Urine

**Test ID:** FENTX

**Explanation:** The screening cutoff concentration is changing due to an instrument platform update.

| Reference Values                        |
|-----------------------------------------|
| Negative                                |
| Screening cutoff concentration: 2 ng/mL |

| Reference Values                        |
|-----------------------------------------|
| Negative                                |
| Screening cutoff concentration: 5 ng/mL |
