

## IgG/Albumin Ratio, Spinal Fluid

Test ID: CASF

### Explanation:

Due to instrument requirements, the specimen minimum volume for CASF will increase.

| Current Specimen Required                                                                                                                                                                                                                                 |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Specimen Type:</b> Spinal fluid (CSF)<br><b>Container/Tube:</b> Sterile vial<br><b>Specimen Volume:</b> 1 mL<br><b>Collection Instructions:</b><br>1. Submit CSF from collection vial number 2 (preferred, not required).<br>2. Label specimen as CSF. |

| New Specimen Required                                                                                                                                                                                                                                     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Specimen Type:</b> Spinal fluid (CSF)<br><b>Container/Tube:</b> Sterile vial<br><b>Specimen Volume:</b> 1 mL<br><b>Collection Instructions:</b><br>1. Submit CSF from collection vial number 2 (preferred, not required).<br>2. Label specimen as CSF. |

| Current Specimen Minimum Volume |
|---------------------------------|
| 0.5 mL                          |

| New Specimen Minimum Volume |
|-----------------------------|
| 1 mL                        |
