Account Information <b>C7028846 DLMP Rochester</b>		Collected <b>25 Jul 2013 00:00</b>		

**Protein S Activity, P**

Result Name	Value	Unit	Reference Value	Performing Site
Protein S Activity, P	105	%	50-160	MCR
<p>Heparin levels greater than 1 U/ml, inhibitors of the APTT test system (especially lupus anticoagulant), or inhibitors of bovine factor V (such antibodies that may arise in patients treated with certain bovine topical thrombin preparations) may produce a falsely normal Protein S Activity result. Suggest clinical correlation and if indicated consider repeat assay of Protein S Activity and Antigen in the absence of anticoagulation therapy.</p>
