

Patient ID SA00083476	Patient Name SAMPLEREPORT, FMCG4 A	Birth Date 1970-08-31	Gender M	Age 46
Order Number SA00083476	Client Order Number SA00083476	Ordering Physician CLIENT, CLIENT	Report Notes	
Account Information C7028846 DLMP Rochester		Collected 12 Dec 2016 13:00		

Milk Cow IgG4

High
0.25 mcg/mL
Y165
**Reference Value
<0.15**

The reference range listed on the report is the lower limit of quantitation for the assay. The clinical utility of food-specific IgG4 tests has not been clearly established. These tests can be used in special clinical situations to select foods for evaluation by diet elimination and

challenge in patients who have food-related complaints, and to evaluate food allergic patients prior to food challenges. The presence of food-specific IgG4 alone cannot be taken as evidence of food allergy and only indicates immunologic sensitization to the food allergen in question. *This test was developed and its performance characteristics determined by Viracor Eurofins. It has not been cleared or approved by the U.S. Food and Drug Administration.
