## Zika Virus, PCR, Serum

### Zika Serum PCR Result

Negative

MCR

Reference Value  
Negative

### Information provided by client at the time of test ordering:

#### Is patient pregnant?

Yes

MCR

#### Has patient been symptomatic?

Yes

MCR

#### Has patient had Zika exposure?

Yes

MCR

### Zika Serum PCR Interpretation

MCR

A negative Zika virus RT-PCR result does not exclude Zika virus infection. If the sample was collected  $\geq 2$  weeks following symptom onset or the last possible exposure to Zika virus, testing for IgM-class antibodies to Zika is recommended. For the most recent CDC guidelines for Zika virus testing, visit: <https://www.cdc.gov/zika/>
